Best Combination of Safety & Strength. Save Time, Money & Stress

Sealers are not 100% stain proof but instead are designed to offer resistance to spillages. Under certain conditions however, all sealers will fail. These conditions are always related to the type of stain and the duration of exposure of the stain on the substrate. It is important that any stains are cleaned off immediately, as prolonged contact increases the likelihood of permanent staining.

Aqua Shield HD™
Commercial Grade Sealer

PRODUCT FEATURES

- ✓ Optimal protection for porous surfaces and non-porous surfaces, tiles, and paving.
- ✓ Quick dry formula.
- ✓ Deep penetrating and impregnating.
- ✓ Can be applied while surface is still wet.
- ✓ Anti-bacterial & silica dust protection
- ✓ Enhanced water, oil, and stain protection technology.
- ✓ Uses advanced nano technology.
- ✓ Efflorescence, salt attack and stain protection
- ✓ Water based, non-flammable, odourless, no toxic fumes.
- ✓ Protects stone, concrete, terracotta, unglazed tiles, pavers & other natural stone against water damage & staining.
- ✓ Provides superior stain resistance against contaminants such as oil, grease, graffiti, coffee, and wine.
- ✓ Does not alter the coefficients of friction or slip factor.
- ✓ Enables easier removal of dirt, food, beverage, oil, and grease stains.
- ✓ Assists in eliminating the occurrence of efflorescence.
- ✓ Reduces moss, mould, and algae growth.
- ✓ Reduces corrosion attack on steel reinforcing.
- ✓ Stone retains a natural look, does not alter the appearance.
- ✓ Will not etch, alter, or discolour the natural look.
- ✓ Highly breathable, allowing water vapour to escape.
- ✓ Alkali resistant, food safe.
- ✓ Provides a salt barrier, ideal around saltwater pools and marinas.
- ✓ Non-Film forming means it will never peel or flake.

HOW IT WORKS

Aqua Shield HD ® works using advanced nano technology which reacts with the surface pores, leaving an invisible, breathable, protective barrier against staining as well as water and oil-based containments. Aqua Shield HD ® premium fast curing sealer, is ideal both indoors and outdoors, on natural stone, tile, grout surfaces, concrete and more with zero unpleasant odours or flammability problems.

SUITABLE SURFACE TYPES

Designed for granite, bluestone, travertine, limestone, slate, sandstone, terracotta, porcelain, ceramic tiles, concrete, all types of pavers and roof tiles.

APPLICATION

- Always perform a trial on a small test patch prior to application.
- The surface to be treated can be dry or remain damp, but it must be clean.
- Protect adjacent areas not intended for application against splashing or overspray.
- Apply Aqua Shield HD ® liberally, by low-pressure sprayer, lamb's wool applicator, bristle broom, paint brush or roller.
- Flood coat the surface to achieve a "wet" look.
- Do not allow the product to pool on the surface. Wipe, broom or buff off extra after 15 minutes with a clean dry cloth or a floor pad.
- Allow to dry, surfaces can be walked on after 4 hours. Full curing requires 24 hours.
